EDUCATION

Chandigarh Engineering College

B.Tech in Artificial Intelligence and Data Science

Landran, Punjab

Expected 2026

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems (SQL), Operating Systems, Computer Networks, Artificial Intelligence.

EXPERIENCE

Camouflex

Backend Intern

Remote

Jan 2025 – Dec 2025

- **API & Backend Development:** Built and improved back-end services, fixing data errors to make the system 40% more stable and reliable.
- **Database Management:** Wrote and optimized efficient SQL queries in PostgreSQL, drastically reducing data loading times from 100ms to 10ms.
- **Application Security:** Created secure user login and session features to protect sensitive data across the application.

Infowiz

Software Engineer Trainee

Chandigarh, India

Jun 2024 – Jul 2024

- **Full Stack Integration:** Connected front-end user interfaces with back-end databases, ensuring a smooth and responsive experience for users.
- **Real-Time Features:** Added live data updates to the application, reducing the time users had to wait for information to refresh.
- **Access Control:** Set up role-based security rules to make sure only authorized admins could view or change sensitive information.

PROJECTS

Realtime Device Tracker | *JavaScript, Node.js, Express.js, leaflet.js, socket.io*

tracker.nitishh.in

- Built a fast tracking app that handles live device data using Node.js and Geolocation API.
- Engineered a low-latency tracking system using WebSockets to transmit geolocation data with sub-100ms delay.
- Containerized the application with Docker and deployed using Render.

CashTrack - Financial Analytics | *React, Next.js, TypeScript, PostgreSQL, Drizzle ORM, Gemini API*

cashtrack.nitishh.in

- Designed a relational SQL database to securely store and organize complex user financial records.
- Built a responsive, user-friendly front-end interface using React-based technologies.
- Integrated Gemini AI API to parse unstructured text inputs into structured JSON and generate financial insights.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL, HTML, CSS, C++

Front-End: React, Redux, Next.js, Framer Motion

Back-End: Node.js, Express.js, REST APIs, Microservices, WebSockets

Databases & ORM: PostgreSQL, MySQL, MongoDB, Redis, Kafka

Cloud & Tools: AWS(EC2/S3), Git/GitHub, Docker, CI/CD (GitHub Actions)

ACHIEVEMENTS

- **Problem Solving:** Solved 300+ complex coding problems, focusing on clean code and efficiency.
- **Technical Excellence:** Scored in the top percentile (500+ marks) in the AMCAT technical assessment.
- **Teamwork & Leadership:** Strong communicator, effective team player, and led a team to Smart India Hackathon.
